Date	19 September 2022
Team ID	PNT2022TMID24889
Project Name	Project – A Novel Method For Handwritten Digit Recognition System
Maximum Marks	4 Marks

Solution Architecture:

- Solution architecture is the process of developing a solution based on defined processes, guidelines, and best practices, with the goal of ensuring that the developed solution fits the enterprise architecture in terms of information architecture, system portfolio, integration requirements, etc.

- Through the design and development of applications and information systems, it can be viewed as a combination of roles, processes and documents designed to address a specific business need, requirement or problem.
